

Akanksha Sharma

Financial Analyst

UNITED STATES | +1 (201) 293-1202 | akankshasharma@myuswork.com | [LinkedIn](#)

Summary:

Financial Analyst with 7+ years of experience in **financial planning & analysis (FP&A), budgeting, forecasting, variance analysis, and enterprise reporting** across banking, wealth management, and technology organizations. Strong expertise in **financial modeling, cash flow analysis, GAAP/IFRS reporting, and executive reporting**, leveraging **Python, SQL, Advanced Excel, and Power BI** to drive revenue optimization, cost reduction, automation and data-driven decision-making.

Skills:

Financial Analysis and Reporting: FP&A, Budgeting, Forecasting, Variance Analysis, P&L Analysis, Financial Statement Analysis, Cash Flow Analysis, General Ledger Reconciliation, Accruals, Month End Close, Capital Expenditure Analysis, Financial Modeling, Scenario Analysis, KPI Reporting

Data and Programming Skills: Advanced Excel Pivot Tables, Power Query, Financial Functions, SQL Joins and Aggregations, Python for Data Analysis, Basic R, Data Validation, Financial Data Analysis, SQL Server, Snowflake

Business Intelligence: Power BI, Tableau, KPI Dashboards, Financial Reporting Automation, Data Visualization

ERP and Systems: SAP, Oracle ERP, ERP Systems, Jira, Confluence

Experience:

Oncorre Ltd, USA

Sep 2025 - Present

Financial Analyst

- Improved reporting accuracy by 25% through SQL based reconciliation, general ledger validation, and variance analysis across revenue and expense management.
- Supported monthly and quarterly close processes including accrual analysis, revenue reconciliation, and performance reporting.
- Conducted revenue, expense and profitability analysis to identify cost optimization opportunities and contributed to a 10% improvement in operating margin.
- Prepared executive level interactive dashboards and financial summaries using Power BI, increasing leadership reporting adoption by 40%.

Coforge Ltd, India

Mar 2021 - Dec 2023

Senior Financial Analyst

- Led FP&A, budgeting, forecasting, and performance analysis for a \$50M annual revenue business unit, supporting executive leadership with monthly and quarterly business reviews.
- Automated financial and regulatory reporting using Excel, Python, SQL, Power BI, and Alteryx, reducing manual reconciliation by 40+ hours per month and improving GAAP-compliant reporting accuracy.
- Built cash flow forecasts, scenario models, and variance analysis frameworks to assess liquidity risk and support funding and capital allocation decisions.
- Identified revenue leakage and cost inefficiencies, enabling \$1.2M in recovered revenue and improved operating margins.
- Managed a 4-member analytics team, delivering standardized business requirement documents, project plans and created Power BI dashboard for a global banking client, reducing manual workload by 25%.
- Awarded Milestone Achievement Award (Top 1%) for excellence in Financial Analysis and Business Intelligence.

Wipro Technologies, India

Jul 2015 - Jun 2019

Financial Planning & Analysis Analyst

- Supported FP&A for a \$100M revenue portfolio, delivering budgeting, forecasting, cash flow planning, and variance analysis across multiple cost centers.
- Developed cash flow and budget models using Advanced Excel, Python, and SQL, improving liquidity planning and forecast accuracy.
- Streamlined financial reporting, consolidation, and month-end close, reducing reporting cycles from 9 to 4 days.
- Delivered 30% annual cost savings through cost allocation, expense analytics, and pricing analysis initiatives.
- Partnered with SAP and Oracle finance teams to support reconciliations, internal controls, and GAAP/IFRS compliance, improving audit readiness.

Education:

Master of Science in Financial Analytics (Data Science) | Stevens Institute of Technology, Hoboken, NJ | GPA: 3.8/4

Relevant Course: Financial Data Science, Machine Learning, Applied Statistics, Quantitative Hedge Fund

Jan 2024 - Dec 2025

Bachelor of Commerce (Honors) | Graphic Era Hill University, India

Relevant Course: Financial Accounting, Corporate Finance, Economics, Project Management

Jul 2012 - Aug 2015

Projects:

Fairness, XAI and Performance in Bank Account Fraud Detection (Data Science):

- Addressed fraud detection challenge in severely imbalanced financial transaction data (**99.5% legitimate**) where traditional models fail to detect rare fraud cases while maintaining fairness across demographic groups.
- Built supervised ML pipeline using fairness-aware learning algorithms, and ensemble methods to balance precision-recall tradeoffs.
- Used SHAP/LIME to generate interpretable risk explanations, reducing false positives and improving analyst review efficiency by prioritizing high-risk alerts.
- Achieved improved TPR at 5% FPR constraints and built interactive dashboard in Plotly studio translating fraud probabilities into low/medium/high risk profiles for operational decision making

Analysis of the Impact of Pitch Type on Contact (Applied Statistics):

- Analyzed large-scale MLB Statcast sensor data to identify which pitch characteristics and contact mechanics drive successful hitting outcomes for strategic player evaluation.
- Applied statistical testing (t-test, ANOVA, Chi-square) to model the relationship between pitch type, launch speed, launch angle and hit probability.
- Identified launch speed and angle as primary predictors of contact quality, delivered quantitative insights for performance optimization and pitch selection strategy with statistical significance testing.
